
AUVANA

Release 0.1

Graziella

Oct 09, 2022

CONTENTS

1	Contents	3
1.1	Usage	3
1.2	API	3

The Automated video Analysis Software (AUVANA) is a video annotation tool that leverages state-of-the-art artificial intelligence to help researchers to automatically analyze their videos and annotate them. The current version of the tool has the following features:

1. Scene detection
2. Keyframe extraction
3. Speech-to-text
4. Object detection and recognition
5. Human face detection and tracking

Note: This project is under active development.

CHAPTER
ONE

CONTENTS

1.1 Usage

1.1.1 Installation

To use Lumache, first install it using pip:

```
(.venv) $ pip install lumache
```

1.1.2 Creating recipes

To retrieve a list of random ingredients, you can use the `lumache.get_random_ingredients()` function:

The `kind` parameter should be either "meat", "fish", or "veggies". Otherwise, `lumache.get_random_ingredients()` will raise an exception.

For example:

```
>>> import lumache
>>> lumache.get_random_ingredients()
['shells', 'gorgonzola', 'parsley']
```

1.2 API
